LABOR IN THE ERA OF GLOBALIZATION EBOOKS 2019

Author: Clair Brown

Release Date: Expected @@expectedReleaseDate@@

The third quarter of the twentieth century was a golden age for labor in the advanced industrial countries, characterized by rising incomes, relatively egalitarian wage structures, and reasonable levels of job security. The subsequent quarter-century has seen less positive performance along a number of these dimensions. This period has instead been marked by rapid globalization of economic activity that has brought increased insecurity to workers. The contributors to this volume distinguish four explanations for this historic shift. These include 1) rapid development of new technologies; 2) global competition for both business and labor; 3) deregulation of industry with more reliance on markets; and 4) increased immigration of workers, especially unskilled workers, from developing countries. In addition to analyzing the causes of these trends, the contributors also investigate important consequences, ranging from changes in collective bargaining and employment relations to family formation decisions and incarceration policy.
