## LABOUR FORCE MATRIX OF PAKISTAN 1987 88 EMPLOYMENT ISSUES REPORT EBOOKS 2019

Author: Pakistan Development Review

Realese Date: Expected @@expectedReleaseDate@@

I. INTRODUCTION Changes which have a direct bearing on the growth and composition of the country's labour force can be identified using a labour force matrix, which provides a detailed classification of the labour force. This paper reports the results of a mainly statistical exercise. It presents a Labour Force Matrix (LFM) of Pakistan for the year 1987-88 [Government of Pakistan (1989)] on the basis of the Labour Force Survey 1987-88 using the same classification as the LFM 1982-83 [see Cohen (1985)]. The use of a common classification enables to highlight some dynamic characteristics of the labour force during the period 1982-83 to 1987-88. On the basis of labour force trends during this period a LFM is estimated for the year 1992-93.
